

BEWARE!

Protect Your Data

Password Security

Your password is the key to your digital world—keep it strong, private and update it regularly to protect your account from unauthorized access.

Know Your Personal Information

Treat your personal data with care—share only what's necessary and keep it secure.

Privacy-Related Mailer

Stay informed through official mailers on how to keep your digital privacy intact.

Data Handling, Identifying PII, and Secure Practices

Keep personal data safe by identifying and securely handling Personally Identifiable Information like PAN, Aadhaar, and bank details. Use strong passwords, avoid public sharing, delete data when not needed, and share only masked Aadhaar with last 4 digits visible.

Stay Informed, Stay Vigilant!
